REMOSA S.p.A.

REFERENCE LETTER

We confirm that Remosa S.p.A. has been a supplier of Petrobras REPAR since 1997, during which time they have provided us with high quality products in the areas of engineering, manufacturing, testing and field service for FCC valves and actuators.

We assigned Remosa the following Purchase Orders :

- 1) P. O. No. 990-10-0877/97 dated 20 November, 1997 for the supply of:
 - internal parts for a flue gas slide valve;

- 2) P.O No. 4500001050/05 dated 05 June, 2003 for the supply of:
 - No. 1 regenerated catalyst slide valve, cold wall design, complete with No. 1 linear hydraulic actuator and Hydraulic Power Control Unit

 - No. 1 linear hydraulic actuator and Hydraulic Power Control Unit for plug valve
 - No. 1 set of actuating system for a flue gas double disc slide valve consisting of:
 - No. 2 linear actuators and
 - No. 1 Hydraulic Power Control Unit
 - Internal parts for a regenerated and flue gas double disc slide valves

The Remosa valves, linear hydraulic actuators and Hydraulic Power Control Units were manufactured in compliance with the Petrobras project specifications. During the project stage, Remosa staff demonstrated a high degree of professionalism, technical expertise and knowledge in the FCC field and worked closely with our technical staff , as a team, to meet our specific needs.

The deliveries of the goods have always been in accordance with the contractual terms, in full and on time.

The valves, linear hydraulic actuators and Hydraulic Power Control Units supplied by Remosa are running smoothly without interruptions since their coming into operation

Remosa continues to be committed to providing us with the highest standards of services paying us regularly visits and working closely with our staff.

We can confidently recommend Remosa as a solid and reliable supplier, and experts in their field.

Sincerely,

João Adolfo Oderich
REPAR Refinery General Manager
