Italy

Subject: Forged Power Reformer Valves for Catalytic Reforming

SARPOM Treocate Refinery awarded Remosa Spa, located in Cagliari Italy, the P.O. No. 8 BM / 4510232613 dated 22 June, 2006 for the supply of the following:

- No. 2 Powerforming Unit Block Valves 8" size
- No. 2 Powerforming Unit Block Valves 10" size

The basic specifications were issued by ExxonMobil.

Remosa has been very active in working closely with SARPOM Treocate Refinery to improve the technical specification and design of the valves for the best performance in Treocate refinery. These valves have been successfully tested at Remosa and CE stamped.

The valves were installed in SARPOM Treocate Refinery on August 2007 and since that time their performance has been very good. At the moment we are not able to have a complete evaluation of internal components integrity that can only be checked at the next internal maintenance, but there is no evidence of poor performance till now.

Because of this good Remosa performance of the previous job, SARPOM Treocate Refinery awarded Remosa the P.O. No. 8C1 / 4510295630 dated 28 May, 2008 for the supply of the following:

- No. 18 Powerforming Unit Block Valves 10" size

Treocate, 01/05/2009

Yours sincerely,

Antonio Barison
Technology & Inspection Supervisor
SARPOM Refinery - Treocate (NO)
