**Att. Giuseppe Buscemi**  
Production Manager

**Ref: Shell CAPSA Refinery Slide Valve SV-302 overhaul**

This note is to certify that *Remosa* has overhauled the following spare slide valve of our FCCU unit prior to the scheduled Turnaround in 2005:

- Spent Catalyst Slide Valve SV-302 (Manufacturer: CHAPMAN)

This valve was transported to a *Remosa* authorized workshop in Buenos Aires for refurbishment where *Remosa* technicians supervised the works. The scope of works is summarized as follows:

- **Boby:** Inspection of internal lining
- **Inlet Cone:** Manufacture and installation of inlet cone (new design with erosion resistant lining)
- **Guides:** Manufacture and installation of new guides with new design
- **Stuffing Box:** Installation of Life Loading

All the internal parts were manufactured and supplied by *Remosa*.  
All the above mentioned works were supervised by *Remosa* technicians

We were favourably impressed with their professionalism and we can recommend *Remosa* for their performance, punctuality and compliance with SHELL requirements.

Your Sincerely,

Daniel J. Ruggeri  
Pressure Equipment Integrity Manager  
Shell Compañía Argentina de Petróleo S.A.
